

Comment s for pENTR1A-TetR
3689 nucleotides

rrnBT1 transcription termination sequence: bases 106-149
rrnBT2 transcription termination sequence: bases 281-308
attL1: bases 358-457
Rabbit β-globin intron II (IVS): bases 602-1174
Tetracycline repressor (TetR) gene: bases 1258-1905
attL2: bases 1919-2019
Kanamycin resistance gene: bases 2141-2950
pUC origin: bases 3060-3687

Recommended *E.coli* strain for propagation: TOP10F'

Eric Campeau October 2004
